The Case for Nuclear

This session will provide a full picture of the case for nuclear. The conversation will begin with a presentation on a new paper which analyzes the attributes of nuclear energy against ESG frameworks from Columbia University and the Center for ESG and Sustainability. In the second session, we will examine the demand for nuclear and discuss the breadth and scope of projects that will need to come online to meet decarbonization goals. We will round out the case for nuclear with highlight nuclear opportunities in non-electric applications.
